PROFESSIONAL SUMMARY

Recent BS Computer Science graduate with solid programming fundamentals (data structures, OOP, problem-solving) and hands-on Python experience building REST APIs and relational database schemas for a final year web project. Comfortable with Git/GitHub, the command line, and collaborative workflows. Currently building on that foundation with Django and FastAPI. Looking for the Python (Django/FastAPI) track of this internship to learn industry best practices under mentorship and grow into a production-ready backend engineer.

TECHNICAL SKILLS

Languages	Python (intermediate), Java, C/C++, C#
Python Track	Django & FastAPI (basic, currently learning), REST APIs, JSON, Django ORM concepts
Databases	SQL, MySQL (intermediate), PostgreSQL (learning)
Web Basics	HTML, CSS, JavaScript, basic React
Tools & Practice	Git, GitHub (branching, PRs), command line, Linux (basic)

RELEVANT COURSEWORK

Data Structures & Algorithms · Object-Oriented Programming · Database Systems · Software Engineering Concepts · Web Technologies · Operating Systems

FINAL YEAR PROJECT

E-Testing System — Web-Based Online Examination Platform

- Built the backend (Python, SQL, REST APIs) for a web platform that digitizes testing and automates result processing.
- Designed the relational database schema and wrote SQL queries for exam, user, and result data.
- Built and integrated REST APIs connecting frontend and backend — the same API-design thinking this internship's Python track is built around.
- Diagnosed and fixed a cross-tab timer-sync bug by redesigning session state handling (sessionStorage + server-side timestamp validation).
- Used Git for version control throughout development.

PROJECTS

Student Manager — Python CLI Application

Personal Project

- Built a command-line student management tool in Python using functions, lists, and dictionaries.
- Implemented add / view / search functionality with JSON file persistence, and version-controlled it with Git.

WHY THIS INTERNSHIP

- Actively learning Django and FastAPI on top of an existing Python and REST API foundation.
- Comfortable with Git branching, pull requests, and issue tracking from FYP teamwork.
- Strong written and spoken English; comfortable documenting work and explaining technical decisions.
- Available full-time, onsite in Lahore, and open to relocating expectations to DHA Phase 8 / Broadway Commercial.

EDUCATION

BS Computer Science — COMSATS University Islamabad, Abbottabad Campus

2022 – 2026

CGPA: 2.59 / 4.00

LANGUAGES

English (Fluent) · Urdu (Fluent) · Pashto (Native) · German (Basic) · Arabic (Basic)

AVAILABILITY

Available immediately, full-time, onsite in Lahore.
